

PLANTRONICS

CA12CD™

PTT ADAPTER

Meets the needs of mission critical applications

The CA12CD is a cordless PTT (push-to-talk) headset adapter designed to provide wireless communications and PTT functionality for applications such as Public Safety Dispatch and Air Traffic Control.

The CA12CD is supplied with the analog Console Interface Cable (PJ-7) as shown. For digital applications, Model SSP 2468-01 (sold separately) can be installed. This USB-PTT

Adapter Cable replaces the Console Interface Cable and provides a complete digital solution.

The CA12CD uses digital processing (DECT™ standard), and operates in the UPCS band (1.92 – 1.93 GHz) in North America. European versions are also available that operate within the DECT frequency range (1.88 – 1.90 GHz).

Applications:

- **Public Safety**
- **Air Traffic Control**
- **Radio Dispatch Facilities**
- **Training/Simulations**

Key Features

PTT Switch, Momentary/Locking Options

Lithium-ion Batteries

Selectable transmit and receive ranges

Security in compliance with USA regulations; HIPAA

Advantages

Plantronics traditional configuration

Up to all day/shift use; Ends battery management issues

Emulates carbon, electret and dynamic mics

Standard DECT 64 bit encryption

Benefits

Reliable and field proven; user selectable

8 hours of talk time

Universal compatibility

Secure and private communications

CA12CD Key Components

Base Unit:

- Two charging wells (unit supplied with an extra battery)
- Sending and receiving sensitivity controls
- Status LEDs for Power, Battery Charging and PTT
- Coil cord (10 ft. extended) with PJ-7 connector
- Battery recharge time: 1 hour (90%); 3 hours (100%)
- Operating temp. range: +4°C (40°F) to +49°C (110°F)

Remote Unit:

- PTT button with momentary/locking selector
- On-Off button with LED
- Robust metal belt clip
- Receiving volume control
- 12 inch cable with Quick Disconnect™
- Accepts all Plantronics "H" Tops
