

PLANTRONICS

Savi[™] Office

INTEGRATE YOUR PC AND DESK PHONE
COMMUNICATIONS WITH ONE WIRELESS HEADSET

Does your business use only a single method of communication? Then why choose a wireless headset that limits you to just one approach? Plantronics Savi Office lets you use one wireless headset to connect to multiple communication applications and devices—desk phones, PC softphones, and PC audio. Enjoy maximum versatility combined with superior sound quality—a Plantronics hallmark since 1961.

The Plantronics Savi Office headset system is as versatile as you need it to be. Cross device. Cross platform. Cross applications. So you can cross other headsets off your list.

PLANTRONICS

Savi™ Office

WORK SMARTER

Mix calls across platforms. Teleconferencing has never been easier or more powerful—you can now connect a softphone call on your PC with a call on your desk phone at the touch of a button. You can easily mix in colleagues from around the building or around the world, regardless of the device the caller is using.

Freedom to move. On a long conference call? Savi Office features an extended range allowing you to roam away from your desk and talk hands free while staying fully connected.

Real-time business collaboration. Need a colleague to quickly jump on a call? With Savi Office you can connect multiple headsets to a single base system for convenient on-the-fly conferencing.

Energy efficient for longer talk times. An adaptive power system maximizes battery life by sensing proximity to the base system and dialing the power up or down as needed. This reduces overall energy consumption, extends battery life and gives you more time to talk.

Business-critical sound quality. Savi Office delivers the very best in sound quality on both sides of the call. With enhanced speaker design and a noise-canceling microphone that filters distracting background noise, Savi Office provides lifelike fidelity with your wideband PC audio.

VERSATILITY

Connect and communicate. Savi Office integrates your desk phone and PC so you can make a call over a softphone, then switch to an incoming call from your desk phone. And if you need to jump on a web conference, no problem, Savi Office lets you easily switch. All without changing your headset; all with superior call clarity.

Easily manage your calls. Our new software, PerSono® Suite, lets you mix PC and desk phone calls, mute a call, or put a call on hold with the click of a button. Plus, Savi Office lets you personalize and save ring tones, volume levels, and default settings, so you get the audio experience that's right for you.

Pack your Savi Office headset. Traveling to another location across campus—or across the continent? Thanks to its modular design, the Savi Office headset is easy to set up. Multiple headsets can be subscribed to a single base system, so you can bring your Savi Office headset with you and reconnect to a different base in a different location.

Pick your Style. The Savi Office system offers a variety of headset designs and wearing styles, each carefully designed and tested to deliver all-day wearing comfort, so you can pick the model that's right for you.
