

## Wireless Headset Training Adapter (03929-63) User Guide

Here are some of the setup options below:

### Instructions:

Plug the first headset system into jack "A". Plug the second headset system into jack "B".

Mute the first headset system by pushing down the "A mute button" on the top of the adapter when desired.

Mute the second headset system by pushing down the "B mute button" on the top of the adapter when desired.

### Compatibility Setting:

(1 or 2 on back of the adapter)  
Select default setting "2" when plugging two headset systems into the adapter. (For example, when using 2 Plantronics CS50's.)

Select setting "1" when plugging the adapter between 2 headsets and one amplifier. (For example, when using a Plantronics S11 with an additional headset.)

Also works with Plantronics PLX400, PLX500, S10, S12, T10, T20, M10, CS10, 510S, CS70, Polaris headsets and more.
